

Scribble Inspector

STANDARD

PRO

Customize your art supplies

When in scribble mode the inspector bar and inspector shelf changes to reveal handy controls for working with the pens and brushes.

Brush Palette

Click a brush to activate it. Each brush's color and inspector settings are independent from each other.

Brush Color

Displays the current brush color. Click to bring up the standard Mac Colors picker.

Color Palette

The scribble inspector displays the full, large-sized 13x10 matrix displaying 10 shades each of grays and colors. The inspector bar shows a more compact strip with only 5 shades each of grays and colors.

Brush Size, Opacity, and Pressure Sensitivity

Set the size and opacity of the currently selected brush. Tip: you can change the brush size on-the-fly with the [and] keys on your keyboard.

If you're using a pen-based graphics tablet, like a Wacom tablet or an iPad with Apple Pencil connected via the macOS Sidecar feature, then the brush size and color can be pressure-sensitive if those toggles are enabled. In that case the specified brush size and opacity is the maximum size given a maximum amount of pressure.

Click the Reset Brush to reset the selected brush to its factory defaults.

Restrictions

You can choose whether the scribble on an idea space is printed, exported, or presented.
