

Exporting Meta in Markdown

Special meta tags in markdown exports

Markdown Meta Tags

If you have enabled copying or exporting figure meta (via the Edit > Copy As menu or the export dialog, respectively) then Curio will export meta data in some tag-like entities.

For example:

```
Simple figure[^Some notes for this figure.] @progress(25) @rating(4) @priority(1)
@start(2018-02-14) @due(2018-03-15 15:00) @duration(20d) @tags(Love, Home) @resources(Kat,
George)
```

Optionally, when exporting markdown, you can specify that the [normal plain text output is used for meta](#) if you'd rather use the normal text formatting for meta export as detailed in the [Including Meta in Text Exports](#) idea space. So the export text above would look like this instead:

```
Simple figure (25% complete; ★★☆☆; urgent priority; Feb 14, 2018 – Mar 15, 2018 3:00 PM;
duration 20 days; Love, Home; Kat, George) (Some notes for this figure.)
```

Here’s the meta output Curio supports:

Meta Output	Values	Description
@progress(50)	A number from 0 to 100	If checkmarks visible, the figure's percent complete (or @done for 100% if enabled).
@rating(3)	A number from 1 to 5	The figure's rating value (number of stars).
@priority(1)	A number from 1 to 5	The figure's priority value from 1 meaning urgent priority to 5 meaning very low priority.
@start(2018-04-15)	A date with or without a time value	The figure's start date (custom date and time format).
@due(2018-04-25 20:00)	A date with or without a time value	The figure's due date (same customizations).
@duration(2w)	A duration string	The figure's duration is normally not exported, but can be enabled . The abbreviations for year , month , week , day , hour , minute can all be customized, note that month uses "x" by default like TaskPaper.
@tags(Home, NextAction)	A comma separated list of tags	The figure's tags. Choose to export just the tag or tag set and tag: Home or Context.Home . You can also choose the format: @tags(Home, NextAction) , or @Home @NextAction , or #Home #NextAction .
@resources(George, Greg)	A comma separated list of resources	The figure's resources. Choose how much of the resource name to export: George , or GeorgeBrowning , or George Browning , or George Browning . You can also choose the format: @resources(George, Greg) or @George @Greg .
