

New Project from Template

Create and reuse project templates

Create a New Project from a Project Template

1. Choose the File > New From Project Template menu, or...
2. Click the Projects button on the toolbar then click the Switch To New Project Gallery button, or...
3. Option-Shift-Click the Projects button on the toolbar.

Create a New, Blank Project

1. Choose the File > New Blank Project menu, or...
2. From the New Project Gallery window click the Blank Project button.

See a Quick View of a Project Template

- Select the project template in the gallery window then press spacebar.

Create a Personal Template Folder

- Right-click in the template list and choose Add Template Folder. Curio will create an actual folder on your hard disk with the given name within the ~/Library/Application Support/Curio/Version XX/Repository/Project Templates directory. This is where your templates will be stored on disk.

Rename a Personal Template Folder

- Double-click the template folder in the list and rename it.

Delete a Personal Template Folder

- Select the template folder in the list and press the Delete key. After confirming the template folder and any templates it contains will be sent to the Trash.

Copy a Template to a Personal Template Folder

- Drag a template from another template folder and drop it on the target folder.

Remove a Template to a Personal Template Folder

- Select a template then press the Delete key to send the template to the Trash.

Save the Currently Opened Project as a New Project Template

- Choose File > Save As Project Template.
