

# Presentation

## *Curio's presentation preferences*

---

### Scaling Options

Choose whether the idea spaces should be scaled to fit the screen, or if scroll bars should appear as needed to scroll around the window. If the mouse pointer is visible then you can click anywhere in the idea space to scroll around, as well. You can toggle this on-the-fly during the presentation by pressing the S key.

Check “Use minimum idea space bounds” if the unused bottom and right portions of the idea space should be cropped off when the idea space is displayed. If unchecked, then the entire idea space is displayed including unused portions.

### When Done Options

Check “Exit presentation after last slide” if the presentation should immediately end if you try to progress past the last slide, otherwise the presentation will remain on the last slide.

### Selection Options

Click the color well to change the selection color that is used to highlight any selected figures (note that the pointer must be visible to select figures).

### Transition Options

You can specify a default transition to use between idea spaces during the presentation. This can be overridden for specific idea spaces using the idea space's Transition inspector.

## Advanced Options

Curio can automatically pre-collapse mind maps before displaying an idea space in a slideshow presentation. If this would be of interest to you check out the Presentation PreCollapse Mind Maps setting via Curio's Help > Curio Advanced Settings menu.
