

Mind Map Inspector Bar

Change properties via inspector bar

To view the mind map inspector bar changes and inspector panel make sure you have a mind map selected, like the one below, then use the Mind Map buttons on the inspector bar or the Mind Map tab in the inspector shelf.

Inspector Bar

When a mind map figure is selected, the inspector bar will reveal some additional controls:

- **Mind Map**
Click this button to display the mind map inspector popover. The same panels are available in the Mind Map tab in the inspector shelf.
- **Insert Child**
Click this button to insert a child text figure under the current figure.
- **Insert Sibling**
Click this button to insert a next sibling after the current figure. Note if you hold the Option key down the button will change subtly to indicate that clicking will insert a *previous* sibling *before* the current figure.
