

### Presentation Mode

You can show your idea spaces on your computer’s display, or use a projector to share it with a large group. Curio’s integrated presentation mode with custom transitions is perfect for group brainstorming sessions.

### Begin the Presentation

Begin by clicking the Presentation toolbar button, the View > Begin Presentation menu, or using the Share toolbar button.

### End the Presentation

Press the Escape key.

### Context Menu

Right-click on the idea space to show the presentation mode context menu.

There you can switch to a different active layer, perhaps to select figures on that layer, or toggle the visibility of a layer. Choosing an already active layer will hide it, choosing one that isn't active but hidden will make it active and visible. The visibility toggles only persist while showing that slide. Moving forward or back, or restarting the slideshow will restore visibility to their normal values.

Action	Key
End Presentation	Esc
Next idea space	Right Arrow, Down Arrow, Page Down, Spacebar, Swipe Down (see gesture handling notes below)
