

# Editions

Curio is available with the features you need

In this project, features only available in certain editions will have a colored tags, like those to the right, positioned in the top-right corner of the idea space or next to the applicable feature.

STANDARD

PRO

Core includes these great features:	Standard takes Core and adds:	Professional takes Standard and adds:
Freeform notebook environment with our incredibly flexible place anything anywhere idea spaces.	Markdown rich text rendering, plus extensive import and export support.	Master figure styles & stencils, master idea space styles & templates, and master markdown styles for dynamic updates throughout a project.
Rich text figures with support for bundled and personal figure styles.	Reusable templates and stencils, plus Stencils shelf for quick access to frequently used stencils.	Independent figure layers allow for more flexible layouts and arrangements.
Documents and multimedia embedded and aliased files, images, PDF's, audio, videos, Mail messages, web links, and web views.	Integrated equation editor for fast rendering of LaTeX, AsciiMath, or MathML syntax.	Cross references can be created between figures, idea spaces, and web locations for more accurate and organized research.
Integrated collections including mind maps, lists, tables, index cards, albums, pinboards, and stacks.	Focus allows you to concentrate on specific figures, collections, or list/mind map branches while everything else is faded.	Status shelf for easy cross-project task tracking at a glance.
Flowcharting shapes for idea graphs, diagrams, and prototyping.	Brushes and pens allow freeform sketching with pressure-sensitive graphics tablet support.	Regular expressions support in the Search shelf.
Sticky lines with styles & arrowheads; straight, curved, or orthogonal.	TaskPaper import and export.	Presentation mode with transitions, for quick sharing with a group.
Record audio and video notes.	OmniOutliner Pro import.	Advanced project options including project password, per-project project backup settings, external project library.
Searchable meta checkmarks, percent complete, start/due/duration with date calculations, done date, added date, tags, priorities, ratings, resources, notes, actions.	Evernote integration for quick access to your notes in the cloud.	External repositories for sharing styles, stencils, and templates with workplace colleagues.
Import/Export as text, image, PDF, HTML, CSV, OPML, and popular 3rd party mind map formats.	Sleuth and the new Sleuth shelf for easy, one-click Internet research.	
	Organizer sections for independent divisions in larger projects.	
	Sync tasks to Calendar & Reminders.	
	Advanced PDF features including embedded table of contents in PDF exports, PDF Mirror live export of your project in PDF form, and Spread PDF to spread the pages of a PDF across multiple idea spaces.	
	Automatic project backups.
