

Navigator Bar

Helping you traverse through your project

What is the Navigator Bar

At the far right corner of the inspector bar you'll find the navigator bar: a series of controls to help you move around your project and manage what you see in the main content area of the window.

The Splitter Button

- The splitter button is used to open up or close the secondary idea space split view. Option-click on this button to switch the secondary view between the side-by-side and above-below layouts

The Bookmarks Button

1. The bookmarks popup button can be used to create bookmarks to easily jump to points within your project. You can either create a bookmark to an Organizer item such as an idea space, or you can create a bookmark figure. A bookmark figure is a positionable figure which is placed into the current idea space and is useful if you want to mark a specific location within an idea space.
2. Both bookmarks and bookmark figures can be named and assigned one of eight colors for quick identification. All bookmarks are listed in the bookmarks popup in the navigator bar and can either be sorted by name or color
3. To jump to a bookmark or a bookmark figure simply select the item in the bookmarks popup.
4. Option-clicking a bookmark figure's adornment will cycle through the available bookmark colors.
5. To remove a bookmark, choose Remove Bookmark from the bookmarks menu. To remove a bookmark figure, select it on the idea space and press Delete.

The Navigator Button

- The navigator is a popup display showing the complete hierarchy of the current section or project so you can select and instantly jump to another Organizer item. In many cases you can leave the Organizer hidden and simply use the Navigator popup instead.

The Back/Forward Buttons

- The back/forward buttons are available to move back in history, to the idea space or Organizer item you were recently viewing, or forward in history. Just like a browser's back/forward buttons. You can also hold Option while swiping left/right with your mouse or trackpad.

The Previous/Next Buttons

1. The previous/next buttons are available to move to the previous or next item in the Organizer. You can also swipe left/right with your mouse or trackpad.
2. If you hold Command down then the buttons change to indicate that clicking will move you to the first or last item in the Organizer.
