

Part 9: Miscellaneous Features

Linking Figures

Curio has several methods for linking to figures or idea space. These links even work across projects!

Linking Techniques

- ▼ 1. **Jump Actions** – modifies an existing figure so double-clicking it will jump to the destination
 - a. Edit > Copy the jump destination, either an idea space or a specific figure.
 - b. Select the figure to assign the action and choose Edit > Paste As > Jump Action.
- ▼ 2. **Jump Anchors** – a handy jump graphic that when double-clicked jumps to the destination
 - a. Edit > Copy the jump destination, either an idea space or a specific figure.
 - b. Choose Edit > Paste As > Jump Anchor to create a jump anchor figure.
- ▼ 3. **Idea Space Links** – a simple link to another idea space with its preview
 - a. Drag the idea space from the Organizer of a project window and drop it onto the current idea space.
- ▼ 4. **Hyperlinks** – a true “curio://” hyperlink which can even be used in other apps
 - a. Edit > Copy As > Hyperlink the jump destination, either an idea space or a specific figure.
 - b. Select text anywhere (even another app) and choose Format > Text > Add Link then paste.
