

# Part 4: Magical Meta

## Meta

You can associate lots of information with figures. This is called meta data.

Meta data includes tags (with or without tag images), percentage complete, priority, rating, resources, and start & due dates.

Click on a figure and look under the Meta button in the inspector to see lots of options!

This item is assigned to both George, who is 25% done, and Greg, who is 75% done. Thus Curio auto-computes this item as 50% done.
