Part 1: Introduction

Organizer Item Properties

If no figures are selected then the inspector bar shows controls related to Organizer item properties:

Style: Change the style of this idea space using the style gallery

Background: Set a colored or textured background, specify a square or notepaper grid

Meta: Set idea space meta data such as tags and colored labels for use with the Organizer Filter

Notes: Edit extra notes associated with this idea space; notes are rich text and can include images

Transitions: Specify a transition to use for this idea space when in presentation mode

Info: Show and set information regarding this idea space

Dimensions: Set the width and height of the idea space

Project: Set project properties such as a custom icon, working hours, encryption, or Calendar syncing

Context Menu
Right-click on items in the Organizer to quickly set common attributes and perform frequent actions. Also right-click on the idea space background for additional common operations.
