Part 1: Introduction

New Project Gallery

Creating New Projects
Option-clicking the Projects button on the far left side of the toolbar opens the New Project Gallery window, also accessible via the File > New Project From Gallery menu item.

Project Template Organization
Here you can view and organize your project templates into one or more folders which will be created on your hard disk.

Template Folder Associations
Right-click in the folders list to add new project template folders. Associate projects with folders by drag-and-drop from the gallery. Press Delete to remove a project from a folder and place it in the Trash. Use the File > Save As Project Template to create new templates.

Click = Open Project Gallery
Shift-Click = New Project Gallery
Option-Click = Open Project Quickly
