Part 1: Introduction

Inspector Popovers

Many of the buttons you see in the Inspector Bar will open a floating popover where you can change attributes associated with the selected idea space or figures.

Simply click the Inspector Bar button again or press Escape to dismiss an active popover.

Detachable Popovers
Inspector popovers are detachable so you can drag them off and place them anywhere on your screen or even on a secondary screen.

Curio will remember the placements of all detached popovers and restore them between launches.
