Part 1: Introduction

Project Gallery

Opening Existing Projects
Clicking the Projects button on the far left side of the toolbar opens the Project Gallery window, also accessible via the File > Open From Gallery menu item.
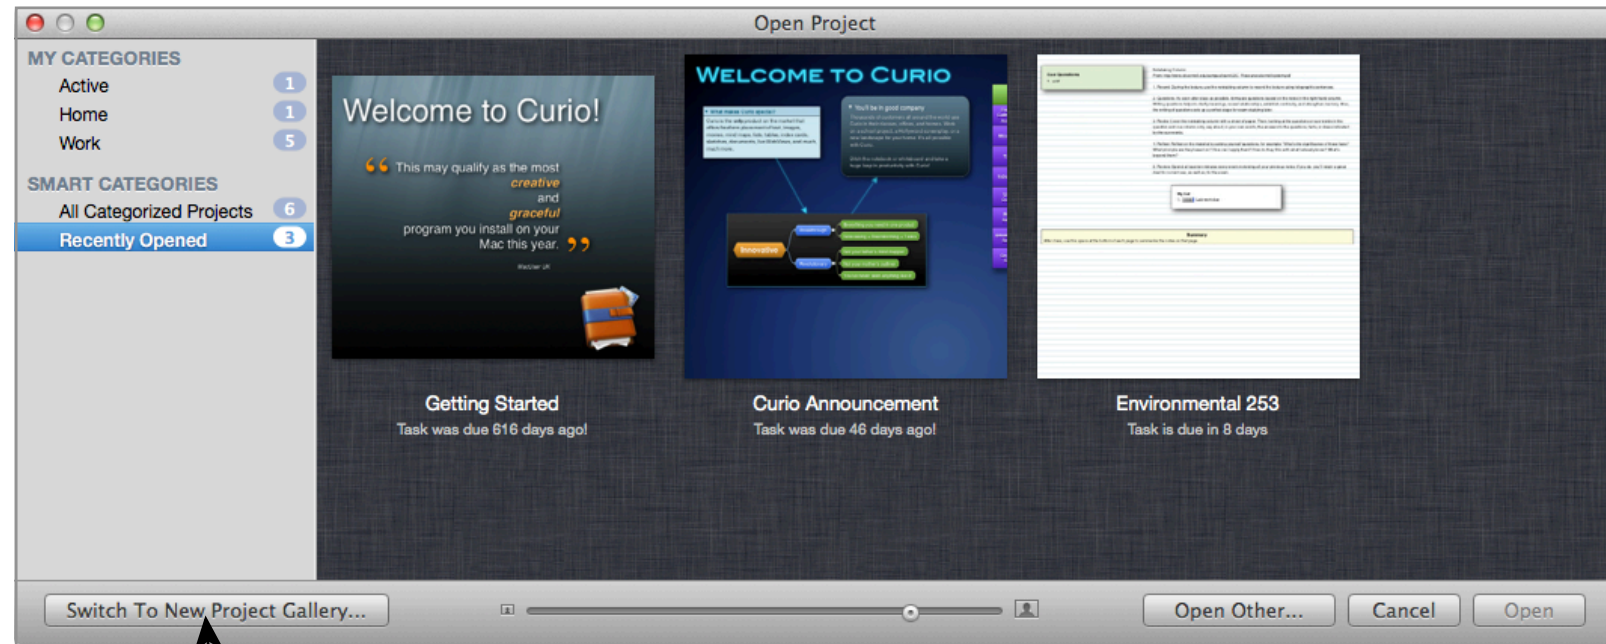

Project Organization
Here you can view and organize your projects into one or more custom categories which are also reflect in the Status shelf which you'll learn more about later.

Category Associations
Right-click in the categories list to add new categories. Associate projects with categories by drag-and-drop from the gallery or from the Finder, or by right-clicking on the project. Press Delete to remove a project from a gallery.

Click = Open Project Gallery
Shift-Click = New Project Gallery
Option-Click = Open Project Quickly

Click to switch to the New Project Gallery to create a new blank project or one based on a project template.
