

# About This Project

*Enjoy this tour of Curio!*

---

This *Welcome* project document provides a brief overview of Curio's amazing features, but we didn't want to overwhelm you so the information is carefully grouped for easy consumption.

If you close this project window and want to view it again, simply choose the **Help > Open Welcome to Curio** menu to re-open it.

## When You're Ready For More

You can find Curio's user manual via the **Help > Curio Documentation** menu item. The documentation is hosted on Zengobi's website so we can more frequently update it with additional content, screenshots, clarifications, and corrections.
